A Letter to Our Readers

Welcome to the *2017 Real Rate Report® Snapshot* edition, the industry's leading data-driven benchmark report for lawyer rates and matter costs.

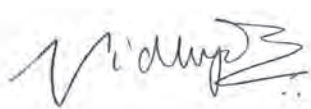

CEB, now Gartner and ELM Solutions once again analyzed more than \$9 billion in legal spending data to provide both buyers and sellers of legal services with the transparency to make more informed matter investments and staffing decisions. As with past Real Rate Reports, all of the data analyzed are from corporations' and law firms' e-billing and time management solutions.

We continue to believe that the depth and granularity of the rate and matter staffing data in the Real Rate Report uniquely enables you to better benchmark, predict, and manage matter costs. As the digital economy becomes the norm and companies expect better information to fuel decision making, the legal services industry relies more on internal analytics and the use of data resources, such as Wolters Kluwer's ELM Solutions LegalVIEW® data warehouse, to support legal management strategies.

As with prior reports, we have included lawyer and paralegal rate data filtered by specific practice and sub-practice areas, metropolitan areas, and types of matters to give Legal departments and law firms greater ability to pinpoint areas of opportunity. Our hope remains that the information and analysis provided in this report will not only inform Legal departments about hourly rates and total costs, but also empower them to make better and more confident decisions that create substantial cost savings and greater satisfaction with the law firms they use.

We strive to make the Real Rate Report editions valuable and actionable reference tools for Legal departments and law firms. As always, we welcome your comments and suggestions on what information would make this publication more valuable to you. We thank you and look forward to continuing the conversation on how Legal departments and law firms can collaborate with better clarity and trust.

Warm regards,

Vidhya Balasubramanian

Practice Leader

CEB, now Gartner

How to Use This Report

The 2017 Real Rate Report:

- Examines law firm rates over time;
- Identifies rates by location, experience, firm size, areas of expertise, industry, and timekeeper role (i.e., partner, associate, and paralegal); and
- Enumerates variables that drive rates up or down.

All the analyses included in the study are derived from the actual rates charged by law firm professionals as recorded on invoices submitted and approved for payment.

Examining real, approved rate information along with the ranges of those rates and their changes over time highlights the role these variables play in driving aggregate legal cost and income. The analyses can energize questions for both corporate clients and law firm principals. Clients might ask whether they are paying the right amount for different types of legal services, while law firm principals might ask whether they are charging the right amount for legal services and whether they could generate additional income if they modified their approach.

Affirmatively or intuitively, company purchasers of law firm services usually evaluate law firm rates based on five classic value propositions¹:

1. **Quality**—Whether good, poor, or acceptable results are routinely achieved
2. **Cost**—The price, or rate, paid to achieve results
3. **Service**—The level of responsiveness and compliance with required processes
4. **Speed**—How quickly matters or tasks are resolved
5. **Innovation**—The application of novel solutions to issues or matters

These value propositions are more or less important across varying practice areas, and their relative values are clearly demonstrated in this study. Delivering fast and excellent results in complicated financial matters is appropriately valued by clients more highly (with resulting higher rates) than is delivering excellent results in routine bankruptcy and collections or real estate matters. The information in this report can assist law firms in considering whether they are properly pricing their services and can further inform the profitability of alternative business models. The Real Rate Report can help companies align their past and future paid rates with the value propositions that return the greatest value by practice area.

¹ Dave Ulrich, Jack Zenger, and Norm Smallwood, *Results-Based Leadership*, Boston: Harvard Business Press, 1999.

A Note on Comparability of Data

The data used for the *2017 Real Rate Report* include more than \$9 billion in fees billed for legal services in the United States during the six-year period from 2014 to 2016. The data comprise fees paid by 106 companies to more than 4,620 law firms and more than 112,000 timekeepers. Table 1 provides a summary description of the US dataset.

In addition, we use a smaller subset of data to provide rate analyses for timekeepers outside of the United States. These data from the same three-year period included more than 10,000 lawyers across 80 countries.

The information is not based on surveys, sampling, or reviews of other published information but on anonymized data showing the actual hours and fees law firm personnel billed. Companies participating in this *Real Rate Report* analysis provided written consent for the use of their data. The data used to create this report exclude identifying information of participant companies and of the matters,

timekeepers, and law firms billing on those companies' invoices. (For more information on the data methodology, see the [Appendix](#).)

This dataset is large enough to provide valuable guidance and represents a statistically useful portion of the \$339.3 billion annual US legal services business.¹ Am Law 100 firms alone had 2015 revenues of roughly \$86.7 billion.² This dataset covers approximately 89,000 partners and associates—spread across more than 340 US metropolitan areas.

Again, this sample is large enough to have useful analytical power, but it certainly does not come close to covering all the lawyers in the United States who work for corporate clients. The US Bureau of Labor Statistics estimates there are more than 619,530 lawyers practicing in the United States—58,900 lawyers in the New York City area alone and another 41,520 in the Washington, DC, area.³

Appendix Data Methodology

2017 Real Rate Report Snapshot

Appendix: Data Methodology

Invoice Information

Most of the data in Wolters Kluwer's ELM Solutions reference database and in the *2017 Real Rate Report Snapshot* were taken from invoice line item entries contained in invoices received and approved by participating companies.

Invoice data were received in the Legal Electronic Data Exchange Standard (LEDES) format (LEDES.org). The following information was extracted from those invoices and their line items:

- Law firm (which exists as a random number in the ELM Solutions reference database)
- Timekeeper ID (which exists as a random number in the ELM Solutions reference database)
- Matter ID (which exists as a random number in the ELM Solutions reference database)
- Timekeeper's position (role) within the law firm (partner, associate, paralegal, etc.)
- Uniform Task-Based Management System Code Set, Task Codes, and Activity Codes (UTBMS.com)
- Date of service
- Hours billed
- Hourly rate billed
- Fees billed

Non-Invoice Information

To capture practice area details, the matter ID within each invoice was associated with matter profiles containing areas of work in the systems of each company. The areas of work were then systematically categorized into legal practice areas. Normalization of practice areas was done based on company mappings to system-level practice areas available in the ELM Solutions system and by naming convention. The majority of analyses included in this report have been mapped to one of 12 practice areas, further divided into sub-areas and litigation/non-litigation (for more information on practice areas and sub-areas, please refer to page 179-181).

To capture location and jurisdiction details, law firms and timekeepers were systematically mapped to the existing profiles within ELM Solutions systems, as well as with publicly available data sources for further validation and normalization. Where city location information is provided, it includes any address within that city's defined Core-Based Statistical Area (CBSA) as defined by the Office of Management and Budget (OMB). The CBSAs are urban centers with populations of 10,000 or more and include all adjacent counties that are economically integrated with that urban center.

Appendix: Data Methodology

A Note on US Cities

Throughout the report, we have used city names to refer to CBSA and consistently used the principal city in the CBSA to refer to the entire area. The following are the shorthand city names used in this report and the corresponding CBSA designations, as defined by the OMB.

Principal City	CBSA Name
Akron, OH	Akron, OH
Albany, NY	Albany-Schenectady-Troy, NY
Albuquerque, NM	Albuquerque, NM
Anchorage, AK	Anchorage, AK
Ann Arbor, MI	Ann Arbor, MI
Atlanta, GA	Atlanta-Sandy Springs-Marietta, GA
Austin, TX	Austin-Round Rock-San Marcos, TX
Baltimore, MD	Baltimore-Towson, MD
Baton Rouge, LA	Baton Rouge, LA
Birmingham, AL	Birmingham-Hoover, AL
Boise, ID	Boise City-Nampa, ID
Boston, MA	Boston-Cambridge-Quincy, MA-NH
Boulder, CO	Boulder, CO
Bridgeport, CT	Bridgeport-Stamford-Norwalk, CT
Buffalo, NY	Buffalo-Niagara Falls, NY
Burlington, VT	Burlington-South Burlington, VT
Cedar Rapids, IA	Cedar Rapids, IA
Charleston, SC	Charleston-North Charleston, SC
Charleston, WV	Charleston, WV
Charlotte, NC	Charlotte-Gastonia-Rock Hill, NC-SC
Chicago, IL	Chicago-Naperville-Joliet, IL-IN-WI
Cincinnati, OH	Cincinnati-Middletown, OH-KY-IN
Cleveland, OH	Cleveland-Elyria-Mentor, OH
Columbia, SC	Columbia, SC
Columbus, OH	Columbus, OH
Dallas, TX	Dallas-Fort Worth-Arlington, TX
Denver, CO	Denver-Aurora, CO
Des Moines, IA	Des Moines-West Des Moines, IA
Detroit, MI	Detroit-Warren-Livonia, MI
Fresno, CA	Fresno, CA
Grand Rapids, MI	Grand Rapids-Wyoming, MI
Greensboro, NC	Greensboro-High Point, NC
Greenville, SC	Greenville-Mauldin-Easley, SC

Appendix: Data Methodology

Where the analyses focus on partners, associates, and paralegals, the underlying data occasionally included some sub-roles, such as “senior partner” or “junior associate.” In such instances, those timekeeper sub-roles were placed within the broader partner, associate, and paralegal segments.

Demographics regarding law firm size, location, and lawyer years of experience were augmented by incorporating publicly available information.

Anonymization of the Dataset

Prior to inclusion in the ELM Solutions reference database, we systematically scrubbed the data of any information that would identify a particular matter, company, law firm, invoice, or timekeeper (individual). To ensure relationships necessary for analysis, those variables were assigned randomly generated numbers. To maintain data integrity and allow for proper analysis, these numbers are linked across data tables to enforce their associations.

To further ensure anonymity and confidentiality:

- The information is published in such a manner as to make it reasonably impervious to reverse analysis should some attempt be made to determine what data might pertain to any company, law firm, timekeeper, invoice, or matter;
- The *2017 Real Rate Report Snapshot* will not reveal which ELM Solutions client or clients are included or excluded in its analyses;
- Clients are not and will not be informed as to whether their data are included within a particular facet of analysis; and
- No textual description of any legal work performed by any individual exists in the ELM Solutions reference database.

A Note on Insurance Litigation

Our aim is to provide a point of comparison for companies purchasing law firm services. To improve comparability, we removed data related to insurance company defense litigation for all analyses unless noted otherwise. Insurance litigation tends to be less expensive than other types of litigation, as it is typically more repetitive and less complex.

“Real Rate” Definition

The information in this report consists of data taken from client invoices submitted by law firms for work performed from 2014 through 2016. All invoices were submitted through the ELM Solutions e-billing systems and approved prior to 2017.

The analyses contained in this report are derived from aggregating hours, fees, and rates submitted as

line items on those invoices. For a line item to qualify for inclusion in this report, it had to undergo multiple and rigorous testing processes to ensure its validity.

For example, for a rate to be loaded to the ELM Solutions reference database and used in this report, it must have been part of an invoice line entry in which all of the following items were included:

- Name of the biller
- Role of the biller
- Date of activity
- Hourly rate charged
- Time charged
- UTBMS code associated with the time charged
- Total amount charged for the activity

In addition, each line item’s hourly rate was validated against its “real rate” (calculated by dividing the total amount charged for the activity by the time charged). Any line items with an hourly rate that did not align closely with the real rate were not loaded to the reference database.

Real Rate = Line Item Total/Line Item Hours (Units)

Example: \$4,000/10 Hours = Real Rate of \$400

Adjustments the client made to line item amounts subsequent to submission are not factored into the dataset. These types of adjustments may impact the effective rate paid by the client to the law firm but do not reflect the real rate billed.

In short, the real rate is the rate appearing on an approved invoice at the invoice line item level.

Aggregations of data taken from millions of these line item-level invoice entries are the core of the information analyzed.

A Note on Negotiated Rates and Billing Practices

Law firms can generally follow varying practices for submitting their “negotiated” rates on invoices. Firms may submit the negotiated rate as the hourly rate identified on the invoice line item, insert a vendor line item adjustment to ensure compliance, or provide a vendor invoice level adjustment to bring the total amount of the fees into compliance with agreed-on discounts. Although the former two are considered part of the real rate calculation, the latter can be problematic. It is not directly linked to a line item, and therefore, for the purposes of determining the rate, it should not be assumed that the adjustment is related to a specific line item. Invoice-level adjustments may represent a credit or some other type of adjustment placed on the invoice. To ensure these types of adjustments would not adversely

Appendix: Data Methodology

impact the analysis contained within the 2017 *Real Rate Report Snapshot*, the team reviewed the population of invoices and line items to determine what the deviation of the real rate might be based on inclusion or exclusion. The analysis demonstrated that the variance was not significant (less than 1%).

As such, we decided not to include the vendor-level adjustments in the report.

Types of Matters Included in the Analysis

Matters within the ELM Solutions system are associated with areas of work described and defined by ELM Solutions clients. Those areas of work were analyzed and systematically categorized into legal practice areas. Normalization of practice areas was supported by mappings to system-level practice areas available in the ELM Solutions system and by naming convention.

All data included within this report have been mapped to a corresponding practice area. The majority of our analyses focus on the following 12 practice areas:

- Bankruptcy and Collections
- Commercial
- Corporate
- Environmental
- Finance and Securities
- General Liability
- Government Relations
- Insurance Defense
- Intellectual Property
- Labor and Employment
- Marketing and Advertising
- Real Estate

Within each client's areas of work, sub-areas are often identified. The lists that follow identify client areas of work and, within those areas, the sub-areas underneath each practice area. Often, the same sub-area appears within different practice areas. For example, the sub-area "General/Other" when listed under "Commercial and Contracts" refers to general work provided regarding Commercial and Contracts matters. When listed under the "Labor and Employment" practice area, the same sub-area refers to work provided on Labor and Employment. Where applicable and practicable, each area and sub-area has been further subdivided into litigation and non-litigation work for the purposes of granular analysis.
